### **NAME**

archive\_read\_new — functions for reading streaming archives

## **LIBRARY**

Streaming Archive Library (libarchive, -larchive)

# **SYNOPSIS**

```
#include <archive.h>
struct archive *
```

archive\_read\_new(void);

## **DESCRIPTION**

Allocates and initializes a struct archive object suitable for reading from an archive. NULL is returned on error

A complete description of the struct archive object can be found in the overview manual page for libarchive(3).
